July 26, 2019

To whom it may concern:

I am writing to apply for a position of Backend Engineer (Remote) at Learning Machine.

In 2015, I co-founded Archer which sought to provide quality user engagement data and analytics to advertisers, while establishing relationships with commercial venues to rent out space for our kiosks. My work on Archer spanned much of my undergraduate and all of my graduate career, and I learned a great deal through the experience, adapting to whatever was needed of me.

I am confident that the experience I've gained—throughout my undergraduate and graduate education in Computer Science, internships at Intel and Ripple, as well as my own enterprise—commends me. In particular, I believe my exposure to High Speed Networking Research at UC Davis and to distributed systems and network programming at Intel and Ripple make me a good fit for this role.

My resume, synopsizing my experience is enclosed. Please contact me for an interview at jmmcgee.00@gmail.com or (323) 557-8647 as soon as is convenient. Correspondence over email is preferred.

Thank you for your consideration.

Sincerely yours,

Joseph Marvin McGee
